F-Post 12/2/74

Weisberg book mentioned in 'Daily Record'

Harold Weisberg, noted Frederick author on books relating to the assassination of President John F. Kennedy, is accorded considerable mention in the lead story in Friday's issue of "The Daily Record", a Maryland law publication.

The story by United Press International quotes extensively from Weisberg's newest book, "Whitewash IV," recently reviewed in the News-Post, which included the controversial transcript of a Jan. 27, 1964 private meeting of the Warren Commission which showed the commission was worried about "spreading rumors that (Lee Harvey) Oswald had been on the FBI payroll."

(Weisberg said his new book has brought widespread national response but no papers except the Frederick News-Post have mentioned his charge that President Gerald Ford illegally used the former "top secret" transcript in the publication of Ford's 1965 book on the assassination.)
